TRIPLEALPHA
innovation

Position:
Data Scientist

Mission:
Optimization of industrial processes using data records

Qualification required:
+ Engineering or Degree in Physics, Mathematics or Computing
+ Telecommunications engineering
+ Industrial engineering, specializing in Automation and Electronics
+ Master's Degree in Mass Data Analysis Technologies: Big Data or equivalent

Specific knowledge:
+ Machine Learning, Big Data, Data Mining, Predictive Maintenance
+ Sound knowledge on probability and statistics
+ Programming in Python, R and/or Matlab
+ Experience in data analysis
+ English: B2

Functions:
+ Data management and extraction from different sources
+ Development of predictive models
+ Automation of optimization processes

What we offer:
+ A project with a great future
+ Training in machine learning and IoT
+ Immediate start
